

FOR IMMEDIATE RELEASE

Erado Message Control Solutions (www.erado.com), the leading provider of SaaS based email archiving, compliance, security, and encryption solutions, announced that it has added support for PGP and SMIME encryption to its SaaS based email encryption service.

Erado's SecureMail provides a fully automated, comprehensive outbound email security and content policy solution that automatically secures and encrypts email without the need for end user encryption/decryption software, or website registration.

How it works... when personally identifiable information, and/or content policy based content is found in an outbound email message, Erado's SecureMail secures and encrypts the message based on content and recipient policy into the easiest format such as secure web portal, zip encryption or TLS for the recipient. With the new addition of PGP and S/MIME support Erado's SecureMail can ensure secure delivery of the message into the easiest format for the recipients address while adhering to both sender and recipient compliance and archiving policies

SecureMail will work with any existing mail server or service and is transparent to email archiving and compliance solutions allowing for unencrypted archiving and supervision.

SecureMail also addresses the complex government mandated email encryption regulations such as the FTC's Red Flag Rule, and new secure email requirements in Nevada, and soon Massachusetts.

About Erado

Erado is a leading managed service provider of SaaS based email archiving, security and compliance solutions. Founded in 1994, the privately held company offers a complete line of email, instant message, and conference call, archiving, security, compliance, and technology solutions.

Companies worldwide including banks, broker/dealers, financial advisors, utilities, healthcare, manufacturing, and technology rely on Erado's archiving and compliance solutions. Erado is an industry-recognized Third Party Download Provider satisfying rules SEC 17a-4 and 204-2 and FINRA 3010 and 3110.
