

For Immediate Release

RENTON, WA. April 23, 2008 – Erado the leading on-demand message security archiving, compliance, and hosting services, announced its upgraded automatic white (AWL) listing module for its anti-spam, virus, and content filtering service.

Erado's new approach to automatic white listing utilizes message journaling (the same process used for message archiving), to automate the arduous of task white listing customers and business partners.

Calvin Cochran, CTO of Erado stated that “ as the problems with compromised computers sending millions of spam messages a day, and the ability for spammers to beat industry standard captcha security the only way to combat the ever increasing amount of spam, is to be more aggressive with filtering and white listing. Our new AWL service makes that easy for all of our customers.”
