

## *FOR IMMEDIATE RELEASE*

Erado Message Control Solutions ([www.erado.com](http://www.erado.com)), the leading provider of SaaS based email archiving, and compliance solutions, announced the deployment of its new SaaS based management control center for managing its email archiving, security, and anti-spam applications.

Millions of small and medium sized business should be archiving email and instant messages for e-discovery and compliance purposes, yet most lack the resources required to deploy an on-premise system. Most other SaaS based solutions are too expensive or lack the needed features to comply with today's requirements.

Erado's email archiving services are inexpensive, feature rich, easy to implement, easy to manage, and exceeds today's rigorous e-discovery, archiving, and compliance requirements.

New Features include:

- \* Unlimited archive storage
- \* User defined Boolean based archive search
- \* Easier archive export to PST, EML, and XML
- \* Easier anti-spam management and white list searching
- \* Enhanced outbound content management
- \* Improved SecureMail recipient delivery management
- \* Additional account administration options

and the addition of Conference Call and Webinar Archiving through our partner Link Conference.

## About Erado

Erado is a leading managed service provider of SaaS based email archiving, security and compliance solutions. Founded in 1994, the privately held company offers a complete line of email, instant message, and conference call, archiving, security, compliance, and technology solutions.

Companies worldwide including banks, broker/dealers, financial advisors, utilities, healthcare, manufacturing, and technology rely on Erado's archiving and compliance solutions.
